

# National Board of Chiropractic Examiners

## September 2010 Time Schedule

**Always allow sufficient time to arrive at the test site for registration. Registration times for full part examinations (Part I, Part II, Part III, Acupuncture and Physiotherapy) are listed below. If you are taking individual subject examination(s), and not the entire Part I or Part II, you should arrive at the test site 15 minutes prior to the start of the examination(s) to register.**

You must be in your seat at the scheduled starting times for instructions or you will not be allowed to take the examination. You will not be allowed to leave the room during the testing session.

The time schedule allows for a detailed set of instructions at the beginning of each full part. The schedule also allows for a shortened set of instructions at the beginning of each individual subject examination. You will also be given time to complete the information required on the answer sheets and test booklets.

See the reverse side of this page for more information about rules and regulations at the test site.
