Local chiropractor participates in milestone study

GREELEY, CO -- (NAME), D.C., a chiropractic practitioner in the (TOWN or CITY) area, recently participated in a milestone research project for the chiropractic profession.

Dr. (NAME) was among the approximate 10 percent of the nation's licensed chiropractors who represented their profession by providing information for a Survey of Chiropractic Practice.

Working in conjunction with state licensing board members, educators, and field practitioners, the survey was developed and conducted by the National Board of Chiropractic Examiners (NBCE). The NBCE is the international testing agency for chiropractic health care.

The NBCE project was undertaken to define the tasks, duties and professional responsibilities common to licensed U.S. chiropractors. The resulting Report of Chiropractic Practice in the United States will have numerous applications in chiropractic testing and other areas.

Similar surveys developed by the NBCE have to date also been provided upon request to the chiropractic regulatory boards in Canada, Australia and New Zealand.
